IT'S ROGER'S MEDAL,

What a hit was that by which big Room CONNOR put the first ball over the new Polo Grounds fence yesterday, thereby winning THE EVENING WORLD gold medal, a home run and the unmeasured plaudits of the crowd!

That medal is a-making, and it will be a dandy. It will look fine on Rogen's broad

And who can mention a giant of the diamond whose record makes him more worthy of such a decoration?

THEY DON'T GET THEIR MONEY'S WORTH. Two more American girls of wealth have been caught by the chaff of a foreign title. Miss CALDWELL, a Kentucky belle, will wed an ancient and improvident French Prince, thirty years her senior, while Miss FITZGERALD, of this city, will, by marrying him, fernish the means of luxurious living to Lord EDMOND FITZMAURICE, an impecunious and considerably decayed Englishman.

Why will our American girls fall such easy prey to broken-down nobility? Why do they, when blessed with fortune, rather than honor independent, ambitious and worthy young Americans with their love, go chasing after titled baubles.

How any American heiress can prefer fossilized prince or a threadbare lord to a young, handsome, brainy, go-ahead Yankee boy is past all understanding.

They don't get their money's worth.

UPON WHAT GROUND?

BUDDENSIEE, the builder of man-traps. whose flimsy structures constantly menuca the lives of their occupants, and did actually in one case cause loss of life, seeks to be liberated from Sing Sing. Upon what ground does he base his application for a pardon? Does he think the city is getting overcrowded and that it needs such as he to thin the population?

BUDDENSIER is just where he belongs.

DECIDEDLY PICAYUNISH.

The action of the Board of Education in docking the wages of the teachers who closed their schools on May 3, pursuant to the orders of their principals, was not a great act, but on the contrary exceedingly smail.

It is true that three of the schools in the Twelfth Ward were closed without proper in great style. authority. But the subordinate teachers. who simply obeyed orders in closing the schools, are surely not to blame. Should they have refused to obey orders? Of course doing that which they were obliged to do?

Somebody was responsible for the unauthorized closing. The person or persons so responsible alone should feel the displeasure of the Board of Education. It would be very creditable to the Board if it would at once undo this manifest injustice to entirely innocent teachers.

Changes in the Union League Club. Steward Wainwright, for many years connected with the staff of the Buckingham Hotel, has been engaged as steward for the Union League Club, to fill the vacancy caused by the dismissal of Camavito. Clerk Andrews will be acting Superintendent of the Club until further notice.

A Hit for a Medal.

(From the Press.)
Connor gains the distinction of being the first player to knock the ball over the centre-field and right-field fences, and wins the gold medal which THE EVENING WORLD offered to the first player who should perform the feat. The ball cleared the fence about fifty feet to the right of the flagstaff, nearly four hundred feet in a direct line from the plate.

LEGITIME RECRUITS HIS SCANTY ARMY WITH SCORES OF AMAZONS. The Females Take Kindly to Military

Dutles and Show Great Interest in Their New Life-The Men Treat Them Courteously and Are Not Offended at the Innovation-Powder Very Scarce.

The result of the Haytian imbroglio, in which Legitime and Hippolyte have engaged the bulk of the entire population, will probably be arbitration. The Kearsarge is at Port au Prince, whither she at once proceeded that she might see how Legitime was behaving himself.

He is so strongly intrenched at Port au Prince and the natural character of that place is so suited to repelling the enemy, that Hip polyte is not at all likely to take it. Legitime doesn't care to sally forth and do battle with his riwal in the open. So it is hard to see what the outcome will be.

Legitime has drafted nearly everything available into his army. He has even a large number of women in his ranks. They are dressed in the same uniform as the other soldiers, but can be distinguished by their greater delicacy of expression. These females acquit themselves of their military duties very well and seem to show an interest in the pomp and circumstance of war. Many of them have lovers in the soldiers,

so it is very picasant for them. The troops are scattered through the town in large buildings and do not camp out. There is a sail dearth of powder in the supplies of Legitime, so these dusky Amazous do not have to be scared to death by firing off their guns very often. When Legitime scur-ries through the town to visit the outposts there are no salutes fired to welcome him. When the Kearsage fired a National solute after Admiral Gherardi's return from a visit to Legitime it must have broken the Haytians all up to have to squander their good but scarce powder in answering it, gun for gun.

Legitime's mother-in-law died the day before the Kearsarge arrived so she can never serve in the army of her son-in-law. It is not

serve in the army of her son-in-law. It is not known how deeply afflicted Legitime was by losing this graceful feature of his household, but he probably can support the losa. He is dragging everything into the army, and the fields are not being properly looked after. Of course, this will cut off his base of supplies. Hippoiyte is much more reasonable. He leaves enough men out of the army to till and work the fields, so that the cross may be assured.

crops may be assured.

The Amazons of Legitime's ranks are treated with much deference by the other soldiers, who do not resent this innovation of dressing women up in men's uniforms and putting muskets into their hands. They are glad to

have them along.

These warnike females are probably filled with ency when they behold the gorgeous gold lace on the uniforms of Legitime and the officers of his staff. The uniforms of the the officers of his staff. The uniforms of the rank and file are somewhat variegated, and a full uniform is a rarity. PUSH THE FUND.

THE EVENING WORLD asks the generous friends of the poor children of New York to boom this Fund to dimensions which will justify the employment of a large corps of physicians. There is absolutely no limit to the good work that can be done. It is possible to save hundreds of little lives this Summer by proper medical attendance and care. THE EVENING WORLD has already engaged eleven physicians, including a head of the corps, and they will begin work at once. The charity will be conducted on a thoroughly systematic basis, and every dollar contributed will be made to tell in work accomplished.

This corps should at least be increased to twenty doctors. To do this, more funds are needed and needed at once.

The children have generously come to the rescue of the children in this matter. They have given a charming phase to a beautiful charity. Let them keep up their good work. And let their parents give them a helping hand.

Roll up the fund in genuine earnest. The charity is sorely needed. It is not experimental, but a great work of practical good, as demonstrated by the experience of the one physician put into the field last Summer by THE EVENING WORLD.

Generous New York is never called on in a good cause in vain.

FLOWERS OF WIT PROM THE PENS OF OUR And New York's Johnstown Recovers FUNNY MEN. Its Quietude.

> The Number of People Lost Now Reduced to Five.

A Total Damage of \$200,000-The Town a Heavy Loser.

LONG DISTANCE TELEPHONE TO THE EVENTER JOHNSTOWN, N. Y., July 11 .- The Cayalutta has resumed its normal state nearly, the waters having subsided even more rapidly than they rose, and Johnstown, too, though there is some excitement left, is relapsing into its former quietude. Searching parties are out yet for the bodies

of the missing, but these are now reduced to two. With Myers, a lad of ten years, and R. G. Simmons, aged thirty-five. The rumor that a young lady named Ada Miller was among the lost has not been conboy! I noticed that your pin-cushions were

Bodies found and identified number three, and are those of Alfred Coakley, a glove-maker, aged thirty-five: Charles Frear, car-penter, aged fifty-six, and Albert Steadwell, a fourteen-year-old boy employed in a glove about Mind Reader Bishop bein' killed, but

Second Little Boy (solemnly)-He had two factory.
The total number of those known to be lost is thus reduced to five, with a possible sixth if the rumor of Miss Miller's loss be con-

firmed.

The searching parties stayed out all night,
Many citizens also remained out of bed, for
during the night it began to rain again, and
the rain is yet falling steadily.

Since the dans are down now, however, ride with mamma. An't her call most Little Dick I guesso. Mamma is talking there is probably little danger of furthe about the second girl now, an' there is only the nurse an' the junitor left. disaster.
Trains on the Johnstown Railroad are now

running on approximately regular time, with a transfer where the bridge is down.

It is estimated that the total loss by the flood will reach \$200,000, of which the town sastams a large share on its destroyed bridges. es. ion Schriever loses about \$10,000 on his

skin mill and dam. Mr. Stevenson's loss of \$5,000, also on skin mill property, is the pext heaviest, and other mill owners and business men suffer in smaller sums.

business men suffer in smaller sums.

Fortunately no wide pread loss among the people has been brought about and there is no call for ouiside assistance.

The indirect cause of the flood was the breaking of McVeigh's dam, five miles east of the town. The torrent thus let loose washed down the neighboring creeks, overflowing the low ground on both sides.

The dam near the Perry street stone bridge stood for a time against the flood, dividing the waters and making them comparatively harmless.

harmless.

Finally, however, it yielded, and then began the brief reign of terror, during which the stone bridge came down and the lives were lost.
Since the flood has come, there have arisen many stories about the frailty of the dams which gave way, and about an apprehension said to have been fest concerning them; but there is room for plenty of doubt as to

whether any responsibility for the disaster can be fixed on these points.

The emergency which tested the dams be-youd their strength was one of nature's own, and could not have been prevented by hu-man calculation.

AN INDIAN GHOST CASE.

THE VERY QUEER FACTOR IN THE WHIT-NEY DIVORCE SUIT.

An Indian ghost as the disturber of the perect joyousness and love which should exist between husband and wife is a very disagreeable. nasty thing. It puts the Indian question in a new light. After the redskins have gone to their " happy hunting-grounds" they ought to stay there and hunt,
